

Construction Time-shift

Progress With Perspective.

Imagine this development as a Construction Time-shift. The same tracked viewpoints recaptured through to completion, revealing the transformation as one moving visual story.

Structured, repeatable progress visibility for developers, contractors and consultants - captured stage by stage and shaped into a clear visual record.

HOW THE SERVICE WORKS

TYPICAL OUTPUTS

- Planned stage capture around the construction programme
- Repeatable aerial viewpoints and matched framing
- 1-3 minute master film shaped around project progression
- 3-5 shorter edits for stakeholder and communications use
- Selected stills for reporting, project records and case studies

PROJECT VALUE

- Stakeholder and client reporting
- Board, investor and partner updates
- Portfolio and case-study visibility
- Future bids and delivery evidence
- Long-term asset and project storytelling

A structured service for project teams

Skylinedrone combines professional UAV capture with experienced post-production to create repeatable visual records of construction progress. The service can cover the whole project or a defined specialist work package.

WHO WE SUPPORT

- Developers
- Main contractors
- Consultants
- Delivery teams
- Specialist contractors

WHOLE-PROJECT

- Groundworks
- Structure / frame
- Envelope / facade
- Topping out
- Completion

WORK PACKAGES

- Facade / cladding
- Steel
- RC frame / cores
- External works
- Defined package milestones

CAPABILITY & DELIVERY

- CAA & EASA approved UAV operator with construction-focused aerial capture
- 18+ years professional post-production and visual storytelling experience
- Award-winning editing background supporting controlled, project-led delivery
- Programme-led capture planning around agreed milestones and repeat viewpoints
- Professional editing and delivery completed as part of the service
- UK project coverage, based in Maidstone with a strong South East operating base

TYPICAL SIX-STAGE PROGRAMME

6 UAV missions | repeatable framing | 1-3 min master | 3-5 shorter edits | selected client stills | final delivery

Scope is adapted to the project programme, access, location, airspace and required outputs.
